Election/Restrictions

Election of Group I, claims 16 and 48-71 in the reply filed 4/19/04 is acknowledged. Claim 72 is also considered elected for the reasons set forth by applicant in the reply. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 17, 18, 32 and 44 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 4/19/04.

The examiner sincerely apologizes for the delay in examination caused by incorrect processing of the reply, and assures applicant that she will attempt to ensure that all future replies will be PROMPTLY and correctly processed.

New limitations recited in the new claims filed with the reply of 4/19/04 necessitate the following election of species requirement:

This application contains claims directed to the following patentably distinct species:

A) modifying which biases (1) toward a natural amino acid sequence or (2) away from a natural amino acid sequence;

B) a protein design cycle which comprises (1) an SCMF algorithm, (2) a DEE algorithm, or (3) a genetic algorithm.

The species are independent or distinct because for Group (A), modification toward or away from a natural amino acid sequence are necessarily different calculations requiring use and consideration of different structural and energetic factors. For Group (B), each algorithm is different and distinct and would be expected to produce different results.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 16, 48-58, 65-68 and 72 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.
